

DR PANAHPOUR

THE SYSTEMIC DENTIST

Dr. Panahpour Offers Breast Cancer Patients Free High-Tech Gum Disease Screening In Recognition Of National #BreastCancer Awareness Month

Systemic Dentist ~ November 7, 2017

Learn about the Gum Disease Breast Cancer Connection in our new educational brochure!

We are informing patients about Dr. Panahpour's offer of a high-tech Cone Beam Scan screening for anyone who has ever been diagnosed with Breast Cancer, and 50% off for all who are conscious about detecting any possible undesired burden on the body's immune system anywhere in your mouth in the month of October 2017 in honor of National Breast Cancer Awareness Month.

A recent study links gum disease with an increased risk for breast cancer. Read more here: <https://www.systemicdentist.com/blog/2017/11/19/gum-disease-tied-to-breast-cancer-risk>.

We are also working with [BodyLife Imaging](#) Thermography this month for a special of 10% off Thermography for our patients after they get a Cone Beam Screening and diagnostic evaluation by Dr. Panahpour for the month of October 2017.

Feel free to share this with anyone you think would benefit from it.

**Our Gifts to You:
for 2017 National Breast
Cancer Awareness Month**

FREE high-tech dental scan
for hidden oral infection for
Breast Cancer Patients.

50% off high-tech dental scan
for hidden oral infection, open
to all.

10% off Thermography

**Use Appointment
Code: HEALTH**

Why?

1. Women with gum disease are 14% more likely to develop breast cancer.
2. Better technology and training to detect infection missed during a regular (2-D) X-ray and dental exam.

The Goal: to detect potentially hidden chronic burdens on the body's immune system that may hinder its fight against cancer.
